### **Relent Software Technologies, Kannur – PHP Developer**

April 2011 – April 2014

- Worked as in individual contributor as well as in a team to build different PHP based web products.

## **PROJECT HIGHLIGHTS**

### **Volkswagen Australia**

Development and maintenance of web applications of Volkswagen Group,Australia. Working as an individual contributor as well as a team member.

### **Clarity Multimedi**

Clarity is SAAS which primarily focus on health and cosmetic industries.The clientele includes clinics from Australia,USA and UK.Built on PHP and MySQL,Clarity deals with complete automation of clinics including payment,Point of sale,appointment, outbound marketing campaigns etc.

I primarily worked on two of the main modules – Automation of appointment availability check and outbound marketing Email/SMS campaign automations.

### **Pluggable UI interfaces for Salesforce**

Working on different Laravel/Vue.js based web applications that have Salesforce as their primary data source. Also working on Vue.js based user interfaces for salesforce admins which simplifies the manipulation of data from salesforce backend.

I primarily work for Volkswagen Australia for their web and salesforce UI integrations.

## **Syndicate Profile**

Syndicate Profile is a US based crowdfunding real estate company and I worked on building their web dashboard and front end. The application mainly aims at automating most of the end-to-end tasks. SYndicate profile works on equity loans.

I primarily worked on leading the teams, planning the estimation, architecting the structure besides coding three major modules - Projects pipeline stream, automatic payments, interest distribution.

## **Sharestates**

Sharestates is another crowdfunding real estate giant primary work in USA. I worked in a team to build their ever growing web application with multiple dashboards. The application aims to automate tasks besides helping the company to simply complex data manipulation regarding their real estate projects and attributes.

I primarily worked in a team to maintain and develop the application modules such as sponsor, investor dashboards.

## **Bizuma**

Bizuma is a UK based ECommerce platform that allows users to sell or buy products online. UK supports shipping to most countries though primary focus is on the United Kingdom.

I primarily worked on the integration of Amazon marketplace APIs, Shopify APIs, database designing besides coding shipping availability checking and cost calculation.

## **Ziochat**

Ziochat is a chat support window provider for websites. Registered users can copy their one line of javascript code from their dashboard and can have it pasted on their website to get their support window popping up based on preset and calculated conditions whenever someone starts to browse their website/application.

I primarily worked on single handedly designing patterns,databases,architecture and coding the entire web application.Wrote modules for real time communication which uses different languages like Node.js and PHP.

## cpProtect

cpProtect or cPanel Protect is a plugin written for WHM. It allows system admin to plan and take incremental backups for their reseller accounts, automation of restore actions etc. cpProtect support AWS S3,Dropbox, SCP, FTP etc for backups.

I primarily worked on coding the PHP modules for running bash scripts to carry out backup and restore processes besides the entire front end interface.

## Others

Other major works include automation/CRM/HRM solutions for different domains including Education,Health etc.

## EDUCATION

**B Tech in Computer Science & Engineering** 2006-2010, 65.5%

College of Engineering , Trikaripur ( Affiliated to CUSAT)

**Plus two** 2004-2006, 83%

M V M Kunhi Vishnu Nambeesan Smaraka GHS School,Mathil,Payyanur

**SSLC** 2004 ,91%

M V M Kunhi Vishnu Nambeesan Smaraka GHS School,Mathil,Payyanur
